Energy performance certificate (EPC)

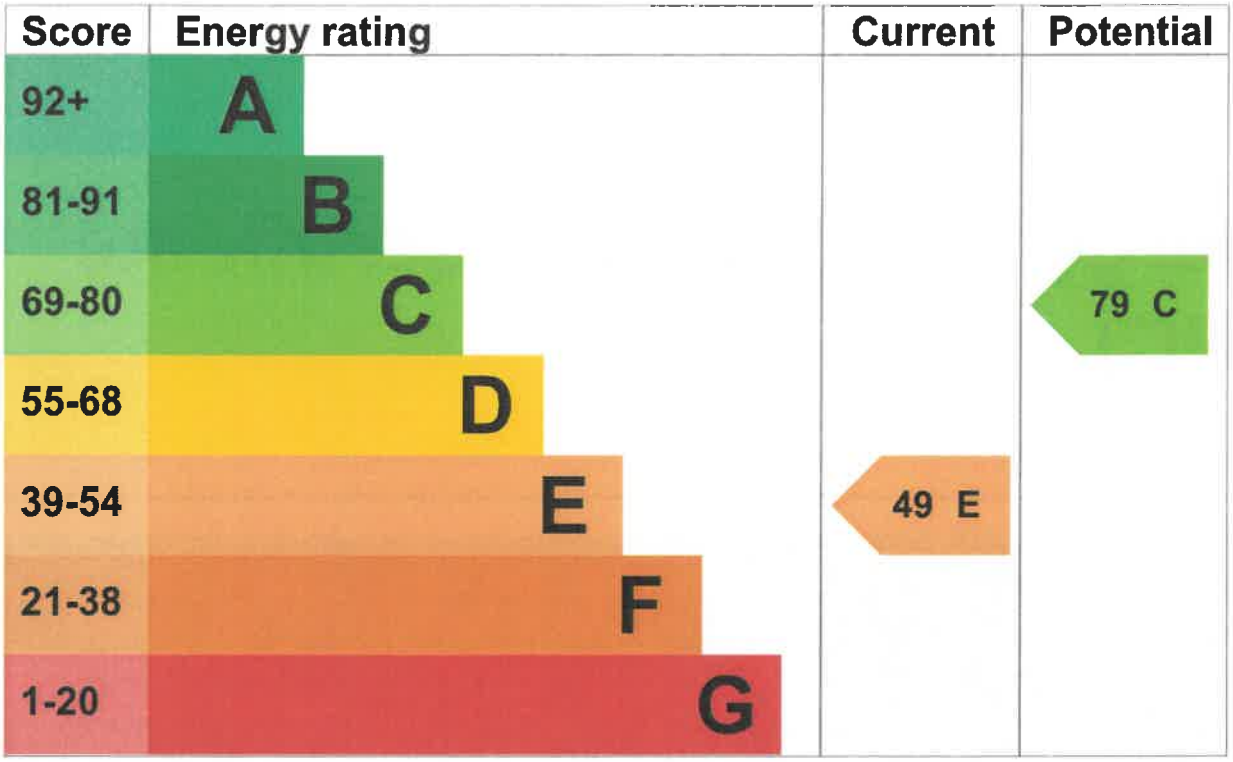
67 Mullaghboy Road Islandmagee LARNE BT40 3TR	Energy rating **E**	Valid until:	**3 November 2035**
		Certificate number:	**2010-8449-7150-2597-7805**

Property type	Detached house
Total floor area	103 square metres

Energy rating and score

This property's energy rating is E. It has the potential to be C.

See how to improve this property's energy efficiency.



The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in Northern Ireland:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Poor
Roof	Pitched, 100 mm loft insulation	Average
Window	Fully double glazed	Average
Main heating	Boiler and radiators, oil	Average

Feature	Description	Rating
Main heating control	Programmer, TRVs and bypass	Average
Hot water	From main system, no cylinder thermostat	Poor
Lighting	Below average lighting efficiency	Poor
Floor	Solid, no insulation (assumed)	N/A
Air tightness	(not tested)	N/A
Secondary heating	None	N/A

Primary energy use

The primary energy use for this property per year is 279 kilowatt hours per square metre (kWh/m2).

▶ About primary energy use

Smart meters

This property had **no smart meters** when it was assessed.

Smart meters help you understand your energy use and how you could save money. They may help you access better energy deals.

Find out how to get a smart meter (https://www.smartenergygb.org/)

How this affects your energy bills

An average household would need to spend **£2,011 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £722 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2025** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 14,345 kWh per year for heating
- 4,793 kWh per year for hot water

Impact on the environment

This property's environmental impact rating is E. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

Carbon emissions

An average household produces	6 tonnes of CO2
This property produces	7.1 tonnes of CO2
This property's potential production	4.2 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

▶ Do I need to follow these steps in order?

Step 1: Increase loft insulation to 270 mm

Typical installation cost	£900 - £1,200
Typical yearly saving	£88
Potential rating after completing step 1	52 E

Step 2: Internal wall insulation

Typical installation cost	£7,500 - £11,000
Typical yearly saving	£272
Potential rating after completing steps 1 and 2	60 D

Step 3: Floor insulation (solid floor)

Typical installation cost	£5,000 - £10,000
Typical yearly saving	£112
Potential rating after completing steps 1 to 3	63 D

Step 4: Hot water cylinder insulation

Increase hot water cylinder insulation

Typical installation cost	£20 - £40
Typical yearly saving	£55

Potential rating after completing steps 1 to 4	**65 D**

Step 5: Low energy lighting

Typical installation cost	£90 - £105
Typical yearly saving	£28
Potential rating after completing steps 1 to 5	**65 D**

Step 6: Hot water cylinder thermostat

Typical installation cost	£130 - £180
Typical yearly saving	£43
Potential rating after completing steps 1 to 6	**66 D**

Step 7: Heating controls (room thermostat)

Typical installation cost	£220 - £250
Typical yearly saving	£83
Potential rating after completing steps 1 to 7	**68 D**

Step 8: Solar water heating

Typical installation cost	£4,000 - £7,000
Typical yearly saving	£41
Potential rating after completing steps 1 to 8	**70 C**

Step 9: Solar photovoltaic panels, 2.5 kWp

Typical installation cost	£8,000 - £10,000
Typical yearly saving	£284
Potential rating after completing steps 1 to 9	79 C

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	Oliver Clark
Telephone	07951464282
Email	oliverclark105@outlook.com

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Quidos Limited
Assessor's ID	QUID210128
Telephone	01225 667 570
Email	info@quidos.co.uk

About this assessment

Assessor's declaration	No related party
Date of assessment	3 November 2025

Date of certificate	4 November 2025
Type of assessment	▶ RdSAP

Other certificates for this property
